Written by a team of lawyers with long-standing experience in patent litigation in Europe, this book is a comprehensive and practical guide to European patent law, highlighting the areas of consistency and difference between the most influential European patent law jurisdictions: the European Patent Office (EPO), England & Wales, France, Germany and the Netherlands. It is frequently the case that the decisions and approaches of these courts are cited by European patent lawyers of all jurisdictions when submitting arguments in their own national courts. The book is therefore intended to provide a guide to patent lawyers acting in the national European courts today. The book also looks to the future, by addressing all the areas of patent law for which the proposed Unified Patent Court (UPC) will need to establish a common approach. Uniquely, the book addresses European patent law by subject matter area, assessing the key national and EPO approaches together rather than in nation-by-nation chapters; and provides an outline in each chapter of the common ground between the national approaches, as a guide for the possible application of European patent law in the UPC.

Intellectual Property (IP) is often a company's single most valuable asset. And yet IP is hard to value, widely misunderstood and frequently under-exploited. IP accounts for an estimated \$5trn of GDP in the US alone. It covers patents, trademarks, domain names, copyrights, designs and trade secrets. Unsurprisingly, companies zealously guard their own ideas and challenge the IP of others. Damages arising from infringements have fostered a sizeable claims industry. But IP law is complex, and the business, financial and legal issues around it are difficult to navigate. Court decisions and interpretation of IP laws can be unpredictable, and can dramatically change the fortunes of businesses that rely on their IP - as demonstrated in the pharmaceutical industry's battle with generic drugs. This comprehensive guide to intellectual property will help companies, investors, and creative thinkers understand the scope and nature of IP issues, pose the right questions to their advisers and maximize the value from this crucial intangible asset.
