"This textbook aims to answer the needs of our undergraduate students (mainly second, third and fourth year students) who speak Arabic, sometimes Berber, French and/or Spanish in addition to English, the target language. Five languages are used for illustration: English, French, Standard Arabic, Moroccan Arabic and Berber. The variety of English that is illustrated from is Standard British English, often referred to as the "BBC English" or the "Queen's English", and the sound pattern of Received Pronunciation (RP), which is a standard British English accent, is described. Broadly speaking, the International Phonetic Alphabet (IPA) has been selected to transcribe all speech sounds. So far as Standard Arabic is concerned, the variety used is the one which is prevalent in the domain of mass media, such as radio, television and newspapers. As to Moroccan Arabic, the variety which is exemplified from is the one spoken in the regions of Rabat and Casablanca. Concerning Berber, the varieties used for illustration are the ones spoken in Ayt Hassan, near Demnat and Ayt Bouzid, near Beni-Mellal."--Http://y.ennaji.free.fr/mohaennaji/books_uml.htm

This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

Morphology is a comprehensive introduction to contemporary morphological theory and analysis in generative grammar. It contains numerous in-text exercises which involve the reader in doing morphology by analysing data from English and numerous other languages. The book is divided into three parts. Part 1 surveys traditional notions of word-structure which remain fundamental to morphological investigations. Part 2 explores the relationship between morphology and phonology in current generative grammar, while Part 3 highlights issues in the interaction between morphology and syntax.

This compact and engagingly elegant text, now in its Second Edition, continues to provide a succinct introduction to Linguistics. The aim of the book is to introduce basic concepts in Linguistics, and to familiarize the students with the fundamentals of modern Linguistics in a clear and simple manner. Each chapter is expository as well as explanatory with examples. Most of the examples in grammar and semantics are based on the structure of the English language, but the principles of language study discussed in the text are applicable to any language in general. Divided into three sections, Section I: The Study of Language; Section II: The Study of Grammar; and Section III: The Study of Semantics, each chapter, besides detailing with the concepts, contains Summary and Comprehensive Questions for better understanding of the subject and enhancing comprehension skills. WHAT'S NEW TO THIS EDITION? An exclusive chapter on the Study of Language Variation (Chapter 5) with important terms such as Dialect, Accent and Stylistics. ? More examples given in the grammar section. ? Devotes an entire chapter to a new topic—Supra-sentential Grammar – a must for Linguistics study today. Students of Linguistics and postgraduate students of English pursuing courses in Linguistics should find this text highly useful and a handy companion for their study
