Introduction to Design

What is design?

Depending on the industry we are talking about, design can have many different definitions. Most generally, “design” is a process for deliberately creating a product to meet a set of needs.

Introduction To
The Design requires
both engineering design
and product design.
Engineering design
focuses on physics, such
as speed, mass and other
performance measures
while product design
also considers user and
consumers by asking
what the user wants in a
product.
