In Strategic Management: Theory and Practice, Fourth Edition, John A. Parnell leads readers through detailed, accessible coverage of the strategic management field. Concise and easy to understand chapters address concepts sequentially, from external and internal analysis to strategy formulation, strategy execution, and strategic control. Rather than relegating case analysis to a chapter at the end of the book, Parnell aligns each chapter's key concepts with 25 case analysis steps. Current examples and high interest real-time cases, largely drawn from The Wall Street Journal and Financial Times, illustrate the key role of strategic management in the United States and around the world.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Tudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

"The Child's Play Polo, Ibiza & Fabia" explains, step by step, with a picture for each, how to do the service of your car. It is based on the certainty that everyone can do it, if clearly explicated and shown. Because it is very simple.This manual is suitable for these models, that must have an engine 1.4 TDI 51, 55 or 59 kw :VW : Polo (2001 - 2009), Fox (2005 - 2010)SEAT : Ibiza (2003 - 2008) ; Cordoba (2002 - 2009)SKODA : Fabia (2003 - 2010) ; Roomster (2006 - 2010)It contains an accurate list of the tools you need, a detailed procedure to do your service, but also to check and replace your front brakes (pads and discs). You will see an example of the service book you should keep up to date, and the scheduled maintenance for all the tasks that have to be done to keep your car in the best conditions.The main goal is to save money. For each maintenance, it will cost you from 35e to 50e maximum, while it costs more than 200e at your car dealer. You save at least 150e per service.More than money, you save time here ! We assure you than after the first learning, you will not need more than 30 minutes! Better than go to the car dealer and wait for two hours.The Child's Play Maintenance manuals have the goal to allow anyone to do its car service himself. We think that your mechanic charge far too much for what it is, and we want you to avoid this useless expense. Each manual is specific to a single model (location of the parts are different, as the way to replace them)

Adaptive Mobile Computing: Advances in Processing Mobile Data Sets explores the latest advancements in producing, processing and securing mobile data sets. The book provides the elements needed to deepen understanding of this trend which, over the last decade, has seen exponential growth in the number and capabilities of mobile devices. The pervasiveness, sensing capabilities and computational power of mobile devices have turned them into a fundamental instrument in everyday life for a large part of the human population. This fact makes mobile devices an incredibly rich source of data about the dynamics of human behavior, a pervasive wireless sensors network with substantial computational power and an extremely appealing target for a new generation of threats. Offers a coherent and realistic image of today ' s architectures, techniques, protocols, components, orchestration, choreography and development related to mobile computing Explains state-of-the-art technological solutions for the main issues hindering the development of next-generation pervasive systems including: supporting components for collecting data intelligently, handling resource and data management, accounting for fault tolerance, security, monitoring and control, addressing the relation with the Internet of Things and Big Data and depicting applications for pervasive context-aware processing Presents the benefits of mobile computing and the development process of scientific and commercial applications and platforms to support them Familiarizes readers with the concepts and technologies that are successfully used in the implementation of pervasive/ubiquitous systems
