EMERGING WRITER PRIZE. For fans of *Eat Pray Love*, *Wild*, and *H is for Hawk*, *The Measure of My Powers* is the story of one woman's search for self-love, experienced through food and travel. "With searing vulnerability and unflinching honesty, Jackie Kai Ellis takes us on an intense and immersive journey from her darkest moments to the redemption she finds through her love of food, Paris, and ultimately, herself." --Jen Waite, bestselling author of *A Beautiful, Terrible Thing* On the surface, Jackie Kai Ellis's life was the one that she and every woman wanted. She was in her late twenties and married to a handsome man, she had a successful career as a designer, and she had a beautiful home. But instead of feeling fulfilled, happy, and loved, each morning she'd wake up dreading the day ahead, searching for a way out. Depression clouded every moment, the feelings of inadequacy that had begun in childhood now consumed her, and her marriage was slowly transforming into one between strangers--unfamiliar, childless, and empty. In the darkness, she could only find one source of light: the kitchen. It was the place where Jackie escaped, finding peace, comfort, and acceptance. This is the story of one woman's journey to find herself. Armed with nothing but a love of food and the words of the 20th-century food writer M.F.K. Fisher, she travels from France to Italy, then the Congo, and back again. Along the way, she goes to pastry school in Paris, eats the most perfect apricots over the Tuscan hills, watches a family of gorillas grazing deep in the Congolese brush, has her heart broken one last time on a bridge in Lyon, and, ultimately, finds a path to life and joy. Told with insight and intimacy, and radiating with warmth and humor, *The Measure of My Powers* is an inspiring memoir, and an unforgettable experience of the senses.

Any discussion of the great masters of American English must include the writings of Mary Frances Kennedy Fisher. For more than sixty years, in her writings about family, food, and travel, Fisher amassed a body of work that belongs on any shelf of classic American writing. Assembled here in this new edition is a generous selection from the books from throughout her career, arranged chronologically, and with this volume, we fortunate readers are now offered a magnificent, intimate survey of her life and writing. Whether reflecting on her father's affinity for the underdog or bravely navigating the trials of old age, Fisher's candor and wit are vigorous and infectious. Tales of travel, childhood memories, recipes massacred and perfected, meditations on World War II, and thoughts on cataract surgery—the range of stories on her palette is surprising and original. *The Measure of Her Powers*, finely edited by Dominique Gioia and introduced by Ruth Reichl, will captivate those who have never read Fisher and deepen the appreciation of her many fans.

The author recounts her first experiences with various foods, recalls memorable meals, and describes her travels

Paul Kennedy's classic naval history, now updated with a new introduction by the author This acclaimed book traces Britain's rise and fall as a sea power from the Tudors to the present day. Challenging the traditional view that the British are natural 'sons of the waves', he suggests instead that the country's fortunes as a significant maritime force have always been bound up with its economic growth. In doing so, he contributes significantly to the centuries-long debate between 'continental' and 'maritime' schools of strategy over Britain's policy in times of war. Setting British naval history within a framework of national, international, economic, political and strategic considerations, he offers a fresh approach to one of the central questions in British history. A new introduction extends his analysis into the twenty-first century and reflects on current American and Chinese ambitions for naval mastery. 'Excellent and stimulating' Correlli Barnett 'The first scholar to have set the sweep of British Naval history against the background of economic history' Michael Howard, *Sunday Times* 'By far the best study that has ever been done on the subject ... a sparkling and apt quotation on practically every page' Daniel A. Baugh, *International History Review* 'The best single-volume study of Britain and her naval past now available to us' Jon Sumida, *Journal of Modern History*

Winner of the Nebula Award for Best Novel: A young man tries to come to grips with his strange gifts as he sets out on a dangerous journey. Brought up in comfort as a house slave for a great family, young Gavir can recall the page of a book after seeing it once. Sometimes he even "remembers" things that are going to happen in the future—a power Gav cannot explain or control, and one that his beloved older sister wisely advises him to keep secret. But when tragedy destroys his trust in all he has ever known, he flees in blind grief, setting off on a treacherous journey towards a goal he does not understand. Is Gav seeking freedom? Or his own people? Then there is the greatest mystery of all: the true use of his powers. "This follow-up to *Gifts and Voices* may be the series' best installment," raved *Booklist*, while the *Toronto Star* praised Le Guin for "her facility in world-making and her interest in human nature" in "a good, long trek of a fantasy." Shortlisted for a Locus Award, the third book of the *Annals of the Western Shore* is an epic story of survival and self-discovery that brings its hero home at last to a place where he has never been before.

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

Like Richard Ellmann’s *James Joyce*, Richard Zenith’s *Pessoa* immortalizes the life of one of the twentieth century’s greatest writers. Nearly a century after his wrenching death, the Portuguese poet Fernando Pessoa (1888–1935) remains one of our most enigmatic writers. Believing he could do “more in dreams than Napoleon,” yet haunted by the specter of hereditary madness, Pessoa invented dozens of alter egos, or “heteronyms,” under whose names he wrote in Portuguese, English, and French. Unsurprisingly, this “most multifarious of writers” (*Guardian*) has long eluded a definitive biographer—but in renowned translator and Pessoa scholar Richard Zenith, he has met his match. Relatively unknown in his lifetime, Pessoa was all but destined for literary oblivion when the arc of his afterlife bent, suddenly and improbably, toward greatness, with the discovery of some 25,000 unpublished papers left in a large, wooden trunk. Drawing on this vast archive of sources as well as on unpublished family letters, and skillfully setting the poet’s life against the nationalist currents of twentieth-century European history, Zenith at last reveals the true depths of Pessoa’s teeming imagination and literary genius. Much as Nobel laureate José Saramago brought a single heteronym to life in *The Year of the Death of Ricardo Reis*, Zenith traces the backstories of virtually all of Pessoa’s imagined personalities, demonstrating how they were projections, spin-offs, or metamorphoses of Pessoa himself. A solitary man who had only one, ultimately platonic love affair, Pessoa used his and his heteronyms’ writings to explore questions of sexuality, to obsessively search after spiritual truth, and to try to chart a way forward for a benighted and politically agitated Portugal. Although he preferred the world of his mind, Pessoa was nonetheless a man of the places he inhabited, including not only Lisbon but also turn-of-the-century Durban, South Africa, where he spent nine years as a child. Zenith re-creates the drama of Pessoa’s adolescence—when the first heteronyms emerged—and his bumbling attempts to survive as a translator and publisher. Zenith introduces us, too, to Pessoa’s bohemian circle of friends, and to Ophelia Quieroz, with whom he exchanged numerous love letters. Pessoa reveals in equal force the poet’s unwavering commitment to defending homosexual writers whose books had been banned, as well as his courageous opposition to Salazar, the Portuguese dictator, toward the end of his life. In stunning, magisterial prose, Zenith contextualizes Pessoa’s posthumous literary achievements—especially his most renowned work, *The Book of Disquiet*. A modern literary masterpiece, *Pessoa* simultaneously immortalizes the life of a literary maestro and confirms the enduring power of Pessoa’s work to speak prophetically to the disconnectedness of our modern world.
