This open access book explores the global challenges and experiences related to digital entrepreneurial activities, using carefully selected examples from leading companies and economies that shape world business today and tomorrow. Digital entrepreneurship and the companies steering it have an enormous global impact; they promise to transform the business world and change the way we communicate with each other. These companies use digitalization and artificial intelligence to enhance the quality of decisions and augment their business and customer operations. This book demonstrates how cloud services are continuing to evolve; how cryptocurrencies are traded in the banking industry; how platforms are created to commercialize business, and how, taken together, these developments provide new opportunities in the digitalized era. Further, it discusses a wide range of digital factors changing the way businesses operate, including artificial intelligence, chatbots, voice search, augmented and virtual reality, as well as cyber threats and data privacy management. "Digitalization mirrors the Industrial Revolution's impact. This book provides a complement of perspectives on the opportunities emanating from such a deep seated change in our economy. It is a comprehensive collection of thought leadership mapped into a very useful framework. Scholars, digital entrepreneurs and practitioners will benefit from this timely work." Gina O'Connor, Professor of Innovation Management at Babson College, USA "This book defines and delineates the requirements for companies to enable their businesses to succeed in a post-COVID19 world. This book deftly examines how to accomplish and achieve digital entrepreneurship by leveraging cloud computing, AI, IoT and other critical technologies. This is truly a unique "must-read" book because it goes beyond theory and provides practical examples." Charlie Isaacs, CTO of Customer Connection at Salesforce.com, USA "This book provides digital entrepreneurs useful guidance identifying, validating and building their venture. The international authors developed new perspectives on digital entrepreneurship that can support to create impact ventures." Felix Staeritz, CEO FoundersLane, Member of the World Economic Forum Digital Leaders Board and bestselling author of FightBack, Germany

(Quick Pro Guides). Dot Bustelo's signature approach to teaching Logic will get you up and running quickly. She'll help you move beyond the basics to discover a professional-level Logic workflow, taught through highly musical examples that expose Logic's essential features and powerful production tools. You'll find many of the tips, tricks, and insider techniques that powered Logic to its industry-leading status as the best tool for unleashing creativity in songwriting, composing, making beats, and remixing. Plus, find out why musicians over the years have sworn Logic "grooves better." Dot provides the powerful methodology for creating in Logic that she has shared with countless high-profile

bands and Grammy Award-winning producers and engineers. Here's just a sampling of what some of music's most successful artists say about Dot's approach to Logic: Ronnie Vannucci, The Killers: "Dot has made Logic, well, logical." Ryan Tedder, OneRepublic: "Dot Bustelo has hands down the most extensive working knowledge of Logic and all its intricacies." James Valentine, Maroon 5: "Dot was the first one to introduce me to Logic.... She knows this software inside and out, and she breaks everything down in an easy-to-understand way. And she knows the best insider techniques that will make your recording more efficient and creative.... I wonder when Dot will get sick of me asking her Logic-related questions?" Nathaniel Motte, 3OH!3: "Dot has provided me with an incredible source of in-depth and practical knowledge of Apple's Logic program. She has shown me tricks in Logic that have opened creative doors that I didn't even know existed." Chad Hugo, N.E.R.D., The Neptunes: "When you got a Logic problem / Dot has wrote a book to solve 'em . . . / And this right here is it. Yeya!" This ebook includes supplemental material.

Inhaltsangabe:Abstract: The market of mobile technologies is growing at an enormous rate worldwide. With the latest developments in technology, new services are being invented which were not even possible some years ago. As new devices, applications and services emerge, also the number of mobile users is increasing in a rapid manner. Mobile broadband networks like UMTS, EDGE or Wireless LAN make it possible to reach a large group of users who gain access with their personal mobile devices, equipped with multimedia and data capabilities. Due to this development, new interesting possibilities arise for many areas. One of these areas is the tourism sector, which is being referred to in this thesis. The so-called m-tourism (mobile tourism) is an emerging field with an enormous marketing potential, as described in Chapter 2. Recent hardware inventions and developments are greatly pushing the market share. Companies are offering tailored products filling the needs of their customers. Personalization of services becomes a popular trend in this sector. But what do users think about such a mobile tourism service? Do they feel the service has added benefits, compared to traditional media and Web-based services? Are those products really user friendly? What would be the crucial applications and qualities that make the big difference ? A range of usability issues concerning mobile services is being discussed in the science community; are there already viable, good solutions? With the recent hype of so-called location based services, the consumer keeps calling for more usable products, featuring more intuitive interfaces. Others may fear being overwhelmed with features. Especially for the senior users, a relatively big target group for most mobile applications, these products often remain a mystery. Usability has been and should always remain a key element for quality software and successful applications. In this thesis, several applications are described, some of their user interfaces are analyzed and major flaws discovered. Furthermore, a corresponding prototype user interface is introduced with a specific analysis of each development step, taken from the book The Usability Engineering Lifecycle by Deborah J. Mayhew. Once prototypical realisations are available, users can validate the implemented approaches and evaluate concepts and realization details from their point of view. Such first user experiences are a valuable guidance for further [...]

Scrum is an agile framework for completing complex projects. This book gives examples, tools, and tricks to do Scrum well. For each trick it is explained why it helps. The practices themselves may be worth trying, but by understanding why it works the readers will be able to come up with their own ideas that work better in their organization and situation. All the practical examples in this book have helped someone, somewhere to become a part of a better Scrum team. Scrum's motto is: Inspect and Adapt; change small things one at a time and see what works. Scrum is not done by project leaders or managers, but really by the teams-to succeed in an organization, the teams must do Scrum well. If the teams do Scrum well, the whole organization will benefit from it. Scrum helps a team self-organize, which fits in well with developers, who usually don't like to be micromanaged. At the same time, Scrum can scale: Self-organized teams work together well, and one manager doesn't have to manage all the people. The lessons from this book help Scrum teams develop into autonomous, proud, and independent teams. Often teams fail to become powerful enough to change the organization, so they cannot perform to their full potential. A good team can lead the stakeholders into trusting them. They will then make plans based on the team's release planning instead of making roadmaps out of thin air, and thus make the organization much more predictable.

Example in this ebook CHAPTER ONE THE CHOSEN LAND "Ooo-ooh! Oo-ooh! Nita!" called Suzanne Baker, as she skipped across the small square of green grass that individualised the brownstone house where Anita Brampton lived. No answer came, so Zan—as she was always called for short—impatiently repeated the call, adding after a moment's pause, "Where are you—come on out!" Still no reply, but the pretty face of Mrs. Brampton appeared at the glass door inside the vestibule. She smiled as she recognised the caller and nodded for her to come in. Zan ran up the steps and said, "How'd do, Mrs. Brampton—where's Nita?" "Looking for you, most likely," laughed the lady of the house. Then, as her smile changed to a petulant look with the changing of her thought, she added, "Dear me! Nita is a sore trial. Did you ever know her to accomplish anything without confusion to others?" Zan knew from experience that that aggrieved tone meant a long harangue on Nita's shortcomings, so she hurriedly changed the subject. "Well, as long as Nita isn't here I guess I'll run along to Miss Miller's. They'll all be there waiting, I s'pose." "All right, dearie; I have a little bridge party in the library, or I would give more time to you," replied Mrs. Brampton, daintily patting down a few stray wisps of blonde hair that fluttered in the breeze from the open door. "Oh, I'm in a great hurry, anyway," returned Zan, starting out of the doorway. At that moment, a maid summoned Mrs. Brampton to the telephone saying that her daughter wished to speak with her. "Wait a moment, Zan—Nita's on the 'phone and you can speak to her after I see what she wants," said Mrs. Brampton, turning back. Zan followed to the small nook where the telephone was kept and stood waiting. Laughter and the sound of coins drew her attention to the bridge players in the large library. Mrs. Brampton finished speaking with her daughter, saying, "Zan is here—wait a second and I'll put her on the wire." Turning to hand Zan the receiver, she whispered, "When you are through here run to the dining-room and have a glass of wine and cake—it is all ready for my friends." "Oh, no, thank you, Mrs. Brampton! You know Daddy doesn't approve of us having wine. We always drink water at home," replied Zan, flushing uncomfortably. "Dear me, I forgot! The doctor is such a radical on these little things!" laughed the lady merrily, patting the girl consolingly on the shoulder with much-beringed hands. She hastened back to her guests while Zan called, "Hello, Nita! Where are you, anyway?" "Ha, ha ha! We're all at Miss Miller's? Why don't you hurry over, too," came a musical voice over the wire. "Just because you didn't do as I said! I told you distinctly to wait for me at the school-gates. You knew I'd be a few minutes late on account of seeing my Latin teacher after school. I asked Bob if he had seen you—he was waiting for some boys in front of the gate—but he said you had hurried away with the girls. So I stopped in here thinking you may have gone home." There was a moment's silence, then a petulant voice, so like Mrs. Brampton's that Zan smiled, said, "Dear me! I'm sure it isn't my fault if you didn't meet us! Why all of the girls should bother to hang around waiting for you, is more than I can tell!" "Well, seeing that the whole plan is mine, and not one of you girls would have been in on it if I hadn't asked you, it seems mighty ungrateful to act so, that's all I have to say!" and Zan jabbed up the receiver on its hook.
