Volvo Penta Forum for engine problem solving and answers

I have a Volvo Penta KAD 44 marine engine. I have problems when running between 2500 rpm and 3000 rpm. It seems like the engine doesn't get fuel. It works perfectly under 2500 rpm and above 3000 rpm. We have worked on different things with the volvo engineers without results.

I have a Volvo Penta KAD 44 marine engine. I have problems ...

For long-term storage, fill the tank, and for periods of more than three months, you might want to consider a fuel stabilizer. If so, make sure to run the boat long enough to get the treated gas into the engine as well. Older tanks might have debris at the bottom, which can get stirred up as the fuel level drops.

10 Common Boat Engine Problems, Why Do Boats Break Down ...

Volvo Penta. Volvo remains 100% committed to marinizing auto engines. The company cites leveraging the auto industry, and its continual advances in fuel efficiency, performance, torque, and reliability, as the primary reason for its decision.

Which Sterndrive is Best: MerCruiser or Volvo Penta ...

This can be the result of worn piston rings, valve guides, or oil seals. The oil can come from an overfilled air filter in the case of a diesel engine or excess oil in the crankcase. White smoke indicates either water vapor from dirty fuel, a water leak into the cylinder or atomized, but completely unburned, fuel.

The Life Expectancy of the Marine Engine - Boat Safe

There is a single reason why this is happening to your engine, and it's faulty fuel injectors. Initially, this problem seems harmless and not as severe, but can and will get progressively worse over time. You can easily inspect your engine for this. Just check the casing with the fuel injectors.
